

This is it

Goodnight Nurse

Let's take it all away
Replace it with everything that we have made
Let's start over again
I'm putting pen to page
And right now I'm all clichés
But words will fade try to keep me awake

And I know
This is it
This is greater than anything
Let's take slow
It's too late
This is greater than anything

Let's have it all our way
Replace it with everything that we have made
We're counting the days
And chasing the nights away
I'll leave this place with a smile on my face

You give me more than you could know
You set me free don't let me go
