This is it

Goodnight Nurse

Let's take it all away Replace it with everything that we have made Let's start over again I'm putting pen to page And right now I'm all clichés But words will fade try to keep me awake

And I know This is it This is greater than anything Let's take slow It's too late This is greater than anything

Let's have it all our way Replace it with everything that we have made We're counting the days And chasing the nights away I'll leave this place with a smile on my face

You give me more than you could know You set me free don't let me go
