## **On Yonge Street**

**Gordon Lightfoot** 

See the people walkin' up and down See the people movin' all around On the streets of my hometown on Yonge Street Longest street in the world they say Summertime soon slips away I hope I'll see you one fine day on Yonge Street Everywhere you go in a city by the lake Back there in the flow you may give a hand a shake Everyone you pass seems to wanna say hello Even late at night on the freshly fallen snow

See the children jumpin' all around See the parents looking up and down Upon the streets of my hometown on Yonge Street It's a mean street if you choose It's a lean street when you lose An in-between street when you cruise on Yonge Street

Everywhere you go in a city by the lake You'll be sure and find it's a case of give and take Everyone you pass seems to want to say hello Even late at night when the streets are all aglow

It's the longest street in the world With the most feet in the world Another street where boy meets girl on Yonge Street See the people walkin' up and down See the people movin' all around Those are the streets of my hometown on Yonge Street

Everywhere you walk people almost say hello Even late at night when the streets are all aglow

On Yonge Street On Yonge Street
