## **Big Mouth**

## **Gorilla Biscuits**

Friendship, to you it means nothing Time and time again you betray friends With lies, and your gossip The stories you tell can hurt like hell!

It's your big mouth and it's getting on my nerves You know I wish you'd just shut it up It's your big mouth and the shit that comes out Has nothing to do with what you're talking about

You know I want to trust you but I can't Your word's not given, it's lent My advice to you, is to start somewhere Why don't you shut the fuck up now

It's your big mouth and it's getting on my nerves You know I wish you'd just shut it up It's your big mouth and the shit that comes out Has nothing to do with what you're talking about
