

Utopia

Gothminister

Utopia, utopia
In the distance you're not forgotten
Utopia, utopia
It's a place you have never seen before

Time will turn our prophecies into
Pure reality that made the world this way
Utopia, utopia
Through the half light we're coming down your way

And we, we are making history
The greatest things are yet to be seen
The everlasting search for utopia

I believe there always will be you and me
Never mind the pain and misery
Tonight, right here, right now is my utopia

Utopia, utopia
For the dead we always travel fast
Utopia, utopia
Lost for centuries, found at last

Well we, we are making history
The greatest things are yet to be seen
The everlasting search for utopia

I believe there always will be you and me
Never mind the pain and misery
Tonight, right here, right now is my utopia

My utopia
Utopia

And we, we are making history
The greatest things are yet to be seen
The everlasting search for utopia

I believe there always will be you and me
Never mind the pain and misery
Tonight, right here, right now is my utopia
