

My Belief

Gotthard

Is the way that I feel like a stain I gotta conceal?
Is the weight of the world lighter with diamonds and pearls?
Every time that I breathe you talk in ways I just can't conceive
Every thought that I own, that is me, that I get, tells me I gotta forget

I believed, I believed it for so long
You and me, now a lonely broken song, just a song
I can scream, but the roller coaster's out and now I'm done
I can see there's no point in holding on
When my belief in you is gone

Is the day that I face just a game that feels out of place?
Is your love, is your love the only thing that you're thinking of?
Every word in my mind
Rolling out the axes to grind
Every sign that I see keeps reminding me
Of every reason why it can't be

I believed, I believed it for so long
You and me, now a lonely broken song, just a song
I can scream, but the roller coaster's out and now I'm done
I can see there's no point in holding on
When my belief in you is gone
My belief in you is gone

On and on and on...
I believed, I believed it for so long
You and me, now a lonely broken song
I can scream, but the roller coaster's out and now I'm done
I can see there's no point in holding on
When my belief in you is gone
My belief in you is gone
My belief in you is gone
I believed and now it's gone
