

What You Get

Gotthard

Going the ride on my own
Living the wave that I'm counting on
Break out the mold that I made
Never the one, never could have stayed

It's a bird, it's a plane, it's another wild claim
It's a white knight against a flame
Is it wrong? Is it right? I think I just saw the light
And yes, I'm gonna take out a bite

Read the writing on the wall, every word and made them fall
What you see... Not to be... What you get
Written out on planet fate, changed it all and got away
What you see ain't gotta be what you get

Taking a turn and I'm thrown
A million to one, never would have known
Thinking I knew what was next
Just back up the thought, never would have guessed

It's a left, it's a right, I'm on a mystery flight
It's a "game on" against divine
Is it up? Is it down? ain't got my feet on the ground
And now I'm gonna take what I found

Read the writing on the wall, every word and made them fall
What you see... Not to be... What you get
Written out on planet fate, changed it all and got away
What you see ain't gotta be what you get

Might not be what you wanna hear
Nothing like you thought it would have been
Might not be everything you fear
Nothing like they said it would have been
Now it's here... Now it's here...

Read the writing on the wall, every word and made them fall
What you see... Not to be... What you get
Written out on planet fate, changed it all and got away
What you see ain't gotta be what you get, what you get
Written out on planet fate, changed it all and got away
What you see ain't gotta be what you get
