

## Keep The Tension On

Gowan

Beware the rotting wind  
Of complacency  
It loves to suck you in  
Till you're history  
If you can't afford the price  
Of a fatal slip  
You better learn to dance  
To the master's whip

Keep the tension on  
It helps to keep the tension on  
There's something to be said  
For the sweating palm  
There's nothing like the high  
>From a ticking bomb  
You've got to put yourself  
To the acid test  
Or let your life decay  
In a fat-cat's rest

All day long I dream I'm outside  
On the hundredth floor  
Down below are people - screaming  
Feel their tension soar
