

# Fear Not

Graham Parker

The dark hand will call you out of nowhere it seems  
The black cloud will bust apart shattering your dreams  
They all put up barricades blank you out at first  
Then they'll get to you to get to me who'll know what's worse

I say Fear not baby fear not Fear not baby fear not  
Fear not baby fear not baby fear not It's going to end

Get your drink knocked over  
you're thinking that it might be planned  
But it's just some fool in the crowd tonight  
What's the name written on his hand  
I won't give away anything more than the ink from my pen  
You ought to know when you look at me  
Love is something you can't offend

I say Fear not baby fear not Fear not baby fear not  
Fear not baby fear not baby fear not It's going to end

I said fear not I said fear not

I can't stand to leave you to the lions of the world  
Yeah I know that it seems like we're in a cage but we ain't the  
animals  
I won't let them touch you not a hair that's on your head  
They can rip out bits of me that should keep them fed

I say Fear not baby fear not Fear not baby fear not  
Fear not baby fear not baby fear not It's going to end

It's going to end
