

Too Much Time To Think

Graham Parker

I wanna walk out the door, I want to take the next bend
This makes the nuclear war seem like a personal friend
The whites won't let you live, the blacks won't let you forget
The Spaniards at the checkout counter just want to make you sweat

And the news comes second hand on the radio am band
And I'm caught in a traffic jam oh
I got too much time to think, too much time to think
I got too much time to think, too much time to think
Too much time to think, too much time to think

There ain't nothing to read, as is read in words
I can't watch the T.V., it all looks absurd
Somebody's standing right here, but nobody's ringing my bell
The best team just lost, I'm not taking it well

And the news comes second hand on the radio am band
And I'm caught in a traffic jam oh

I got too much time to think, too much time to think
I got too much time to think, too much time to think
Too much time to think, too much time to think
