

Life in Outer Space

Grand Funk Railroad

We find our way by moonlight
Life in outer space
Must you leave the planet
Now we're tryin' to save the human race

I was so carefree
But that was then and I am older now
The future sits upon my shoulders now
I must preserve my family
Before there's nothing left to be

There's no place left to run
We ride this ship that's powered by the sun
In search of hope and life for everyone
We might return to earth someday
When all this smoke is cleared away

Find our way by moonlight
Life in outer space
Must you leave the planet, yeah
Now we're tryin' to save the human race

Life in outer space
Life in outer space

There's still a memory
Of what the life on earth's supposed to be
Oh, but they didn't leave it up to me
We might return to earth someday
When all this smoke is cleared away

Life in outer space
