Wait with me 'til morning rises As, you turn to go For just one moment, just one time This time let it show Walk with me until this road ends or To where it leads Would you care if it dropped you in The middle of nowhere Can you hear me? Hang around your head Can you taste it? Hang around, your heaven's just ahead Come now, don't you lie You've had the needle already stuck in your eye More than you claim Could you swear upon your honor that You never cared Can you feel me? Hang around your head Can you taste it? Hang around just hang around and see Dzap! Can you hear me? Hang around your head Can you taste it? Hang around just hang around and see Can you feel it? Banging on your head, hang around. Can you taste it? Hang around, your heaven's just ahead. When it all comes crashing down on you, Hang around. When it all comes crashing down on you, Hang around.
