## Wish You Well

**Grant Lee Buffalo** 

See the end see the end of time From the widow's walk I feel the undertow It grows and my fishin' pole Like a willow bends toward the blackest hole To the hole See the film see the black and whites Circle stationed stupid to the tape that rolls My soul receives another blow From the flashlight of the city hate line Oh oh ooh ooh ooh

I wish you well I tell you that it can be helped I told you it can be helped

See the bad dreams that you speak about And all the things you bring to light are comin' down Now everybody hit the ground Fear is on the march and in the lost and found These are the times to read between the lines Yeah my truck runneth over false prophet signs And road blocks In the road

I wish you well I tell you that it can be helped I told you it can be helped I told you it can be helped

Newspaper cloaks to wrap the truth Propagand-acid dropped on the youth It's easy to see like pulling a tooth No one in line in the ballot booth The Dragon down south may blow some smoke Even the Jester is drummin' up votes They talk about building morale and hope They're just building bigotry a better rope One that won't break one you can't even see One made of paper and policies

I wish you well I tell you that it can be helped I told you it can be helped It can be helped Oh but it can be helped
