You site alone in lightless chambers, all the love you had is gone

No one there to catch your fall, you never felt so alonoe Blackened thoughts in lonely ruins, lifeless eyes an empty gaze

Death is but a promise now, life is just an empty phrase Demons wait in every corner, reach for you with poisened claws

Madness spreads its wings above, you're lying helpless on the floor

No one there - lost alone - madness rules - love is gone No escape - never try - no way out - you will ldie Come out to the other side Agony's your friend

Come out I will lead the way
In life there is no sense

You're my victim, you're my prey, I will get you on demon's day

Can't you see me, can't you fell me, I will get you on demon's day

No one there - lost alone - madness - rules - love is gone The sun will never shiine

No escape - never try - no way out - you will die You die so alone

You've gone through hell, you met the devil, demons paved the way you walked

All alone you took the challenge, no one listened as you talked

Now you live a happy life, with all friends up in your heaad Pills provide an easy shelter, all your sadness now is dead

You're my victim, you're my prey, I will get you on demon's day

Can't you see me, can't you fell me, I will get you on demon's day
