I Don't Need Your Love

Grave Digger

Don't come hanging 'round my backdoor Wanna see your face no more Listen girl just what I say Stay away

I've got more important things to do Than to waste my time with you Shouting your mouth All over town

I don't need your love You better take it or leave it I don't need your love I'm sick and tired of all the lies Behind your painted smile

No more looks that hypnotize Sparkle someone else's eyes You're a no good love machine Crazy scene

All you wanted was to get down Kept your body to the ground And the only way to reach you was in bed

Every time I see your face Satisfaction's growing less Get away, don't try to hold me Let me be

There was never harmony Even when you clung to me There's no place for you in this house Get on out
