

## Silence

### Grave Digger

You are lying there, I hear no silent cry  
A nameless spirit under the cloudy sky  
You've left my life and you left my heart  
I feel endless days of present and past

Eagles fly into the night  
And the world seems to die  
Please come back into my life  
I need you warming light

I open the grave  
And close your eyes  
I touch your face  
Where your spirit lies  
Feel the silence  
Feel the silence

Why have you left me - my beautiful one  
I can't accept it that you have gone  
I kiss your lips, your face, your golden hair  
I'll see you in heaven, I will meet you there

Eagles fly into the night  
And the world seems to die  
Please come back into my life  
I need you warming light

I open the grave  
And close your eyes  
I touch your face  
Where your spirit lies  
Feel the silence  
Feel the silence
