

## Flame of Doom

Graveland

A star outside the galaxies  
From the abyss of the universe  
Born in the darkness  
From non-existing matter  
A non-existing star  
An icy vacuum  
Filled with cold light  
The unknown priest noticed the blaze  
The light of a star pierced his heart  
His eyes saw the blaze of glory  
And the sadness of an impenetrable darkness  
The cold filled his heart  
An impenetrable and unknown will  
The words that filled his mouths  
Came from the abyss of the universe  
The storm is coming  
Thunder in the ancient temple  
Is it not the same flame  
A cold hand has changed its matter  
Warriors in the circle  
Swore the fidelity  
Came from the distant parts of the world  
Awakened from the long sleep  
Nothing is the same anymore  
Soil has changed its colours  
Colours of light faded  
Thunder filled their hearts  
A wind brough the mists  
Trees shed the leaves  
Words spoken in the unknown languages  
Filled the vacuum with cold  
And only the star is shining  
Piercing the matter with its light  
Creating the shadows  
Raising on the wings of its magic  
Four sides of the world  
Hands raised towards the stars  
Weaving the luminous cobweb  
Shining on the sunny wind
