## **Far Away**

Graveworm

The mountains below The flames of your soul are burning still The sky turned black Storms of rain infesting life Moonlight vanishes Darkness shadows rule the world Coldest breeze Frozen winds blown through the sky

(All) light is gone Hopeless time Daylight's shine Far away

The monument of the past Abyss with pain and lies Distant crying witless life Black horizons eternal night's Tragedy withering flowers Darkening in my eyes

Shining light Gates to sky showing life Beautiful silence Tranquillity I have found Agony Was no more and so was pain Forgotten hope In the air and my eyes

The open sky filled with light Heaven's love come to the world Withering flowers swept away Blooming trees in their place

Sunshine fades now away Return deep coldest age

Far away see the light of the life Far away see the light of the life
