

## Legions Unleashed

Graveworm

I crying to the night - Legions unleashed!!!!  
Screaming in pain, spitting the blood to the god  
Destruction of the dying has begun  
Forces of evil, raise the sword to the sky  
Fire in the night, the demons arrived  
In the arms of the ancient beast  
Fire, death and fear  
The darkness spread their wings of death  
The horned one implore  
The legions waked up from the graves  
To be unleashed by their clame  
Demon of the ancient world  
Invading darkest skies  
Forest whispers laments of pain  
Blood flows on the ground  
Fear, the only way to see  
The essence of life ends  
Breathe the stench of buried soul  
Pleasure of the death  
When the stars falls like tears from the sky  
Devoted to the powers of black northern might  
Wolves howl to honour the moon  
Awaits the reign of dark  
Creatures of the night arrived  
Embraced by darkest might  
Blood their only trace to kill  
Between the dreams they ride  
Marches straight to end the life  
Mankind of foible faith  
Beyond the temple of the lost  
Arrival of plague and death  
The garden withered into dust  
Might of spell take life  
Nocturnal eyes reflects the flames  
Ancient race of the gods  
Masterpiece of destruction  
The agony and pain  
The end of the world begun  
The time has come: Legions unleashed
