Down

Gravity Kills

I'm your fear, I'm your monster What's hiding in your shadow? Is it taking what's left of you Now take me, now lead me from you Now take me from the light that's dying in your eye I'm finding out what's left of you, you're burning out What's left of you? Choking on doubt, you're choking Way down way down now what's left of you See no fear, speak no evil Are you screaming out to no one as you fall down a mountain of pride I feel you, my eyes wide open I feel you, do you think you can save yourself in time I'm finding out what's left of you, you're burning out What's left of you? Choking on doubt, you're choking Way down way down now what's left of you What you see, what tears into you Behind the wheel that leads you, are you facing a truth that Won't die? Now take me, now lead me from you Now take me from the light that's dying in your eye I'm finding out what's left of you, I'm finding out what's left of you You're burning out what's left of you, you're king of doubt, You're choking, way down, way down now, what's left of you What's left of you, you're burning out, what's left of you Choking on doubt, you're choking Way down, way down now, what's left of you
