

Never

Gravity Kills

I like to live alone, but it's crowded inside sometimes
Look right into a lover's eye
I thought I could fly but that has been done before
I'm feeling empty, empty inside
A life I never knew
A room without a view
My life begins in you
My life it ends in you
It's like I never never never never
Never been here before
Like to be left alone forever in time
Loved right lived wrong in another life
I thought I could fly but that has been done before
I'm feeling hopeless, hopeless inside
A life I never knew
A room without a view
My life it ends in you
My life begins in you
It's like I never never never never
Never been here before
It's like a different disease burning inside of me
It's like a different disease
Don't deny what's out of your sight
I get drawn into the light
A life I never knew
A room without a view
My life it ends in you
My life begins in you
It's like I never never never never
Never been here before
