Never

Gravity Kills

I like to live alone, but it's crowded inside sometimes Look right into a lover's eye I thought I could fly but that has been done before I'm feeling empty, empty inside A life I never knew A room without a view My life begins in you My life it ends in you It's like I never never never never Never been here before Like to be left alone forever in time Loved right lived wrong in another life I thought I could fly but that has been done before I'm feeling hopeless, hopeless inside A life I never knew A room without a view My life it ends in you My life begins in you It's like I never never never never Never been here before It's like a different disease burning inside of me It's like a different disease Don't deny what's out of your sight I get drawn into the light A life I never knew A room without a view My life it ends in you My life begins in you It's like I never never never never Never been here before
