Just Yesterday

Great White

The days roll on they turn to years We've shared the laughter and the tears Those magic times will never fade We've seen the world together from a stage

Just yesterday when we were young and The world could wait 'cause time was on our side The road would never end What happened my dear friend to yesterday?

The road of dreams rolls on and on We spin our lives into a song Another time another place Another line upon my face

Just yesterday when we were young and The world could wait 'cause time was on our side The road would never end What happened my old friend to yesterday?

And though the time has flown like whispers on the wind We're only here through where we've been And if our paths should chance to cross along the way Will we still remember yesterday?

Just yesterday when we were young and The world could wait 'cause time was on our side The road would never end What happened my dear friend to yesterday?

Just yesterday when we were young and The world could wait 'cause time was on our side The road would never end What happened my old friend to yesterday?

What happened to our yesterday? What happened to yesterday? Wwhat happened to our yesterday?
