

On Your Knees

Great White

I can take you up
I can tear you down
I'm a heat wave coming at you
Taking what I please
Falling on your knees
You need me, yes, you do

From the moment I take over
You're going to call me back for more

Down on your knees, down on your knees, down on your knees
Down on your knees, down on your knees, down on your knees

Knocking down your door
Pull you to the floor
'Cause you need it so bad
Taking what I choose
Never going to lose
I love to drive the young girls wild

Going to drive my love inside you
Going to nail your arse to the floor to the floor

Down on your knees, down on your knees, down on your knees
Down on your knees, down on your knees, down on your knees
Down on your knees, down on your knees, down on your knees
Down on your knees, down on your knees, down on your knees

Here I come now, baby, kicking down your door
Here I come now, baby, pull you to the floor
Taking what I choose, girl, I'm never going to lose
I love to drive the young girls wild, driving my love inside of
you

Down on your knees, down on your knees, down on your knees
Down on your knees, down on your knees, down on your knees
Get down on your knees, get down on your knees, get down on your
knees
Down on your knees, down on your knees, down on your knees
I want you on your knees
Down on your knees, down on your knees, down on your knees
Down on your knees, down on your knees, down on your knees
