

# Run Away

Great White

Surrounded by a thousand eyes, danger in the night  
A city full of broken hearts, burning like white light  
The streets are filled with promises you never get to keep  
The streets are full of dreamers walking in their sleep

You come to me for easy loving  
Starlight in your eyes  
Don't you know it's all or nothing  
Leave before you cry

Run away, run away

You never liked what daddy said, he never understands  
The heartaches of a little girl who needs a magic man  
Young hearts chasing images along the boulevards  
Young hearts lose their innocence reaching after stars

You come to me for easy loving  
Starlight in your eyes  
Don't you know it's all or nothing  
Leave before you cry

Run away, run away, run away  
Run away, run away, run away  
You'd better run away  
Run run away  
Run away, run away, run away  
Run away
