

She Shakes Me

Great White

Look in my eyes, my pupils are shot
I'm running fever
Taken to drink and whatever you've got
I can't believe it

Masquerade ace in hollywood hair
You've got my brains fried
Watching you move having you near
I just can't breathe right

But oh why should I have a reason?
Why hide it? Can't fight it, no longer got control

She shakes me, can't take it no more
She shakes me

Built to ride, a cruiser that glides
She's just a woman
The look in her eye, the sound of a sigh
She loves a warm gun

But oh why should I have a reason?
Why hide it? Can't fight it, no longer got control

She shakes me, can't take it no more
She shakes me

She's mine and she really gets me off
So fine and she really gets me off

She shakes me, can't take it no more
She shakes me

We don't need no reason?
Why hide it? Can't fight it, no longer got control

She shakes me
She shakes me, can't take it no more
She shakes me
She shakes me
