

# She Shakes Me

Great White

Look in my eyes, my pupils are shot  
I'm running fever  
Taken to drink and whatever you've got  
I can't believe it

Masquerade ace in hollywood hair  
You've got my brains fried  
Watching you move having you near  
I just can't breathe right

But oh why should I have a reason?  
Why hide it? Can't fight it, no longer got control

She shakes me, can't take it no more  
She shakes me

Built to ride, a cruiser that glides  
She's just a woman  
The look in her eye, the sound of a sigh  
She loves a warm gun

But oh why should I have a reason?  
Why hide it? Can't fight it, no longer got control

She shakes me, can't take it no more  
She shakes me

She's mine and she really gets me off  
So fine and she really gets me off

She shakes me, can't take it no more  
She shakes me

We don't need no reason?  
Why hide it? Can't fight it, no longer got control

She shakes me  
She shakes me, can't take it no more  
She shakes me  
She shakes me
