Look in my eyes, my pupils are shot I'm running fever Taken to drink and whatever you've got I can't believe it

Masquerade ace in hollywood hair You've got my brains fried Watching you move having you near I just can't breathe right

But oh why should I have a reason?
Why hide it? Can't fight it, no longer got control

She shakes me, can't take it no more She shakes me

Built to ride, a cruiser that glides She's just a woman The look in her eye, the sound of a sigh She loves a warm gun

But oh why should I have a reason? Why hide it? Can't fight it, no longer got control

She shakes me, can't take it no more She shakes me

She's mine and she really gets me off So fine and she really gets me off

She shakes me, can't take it no more She shakes me

We don't need no reason? Why hide it? Can't fight it, no longer got control

She shakes me She shakes me, can't take it no more She shakes me She shakes me
