

Mother Nature Is a Terrorist

Greeley Estates

I can sense it, feel her presence
She's always watching
She's in the air, hear her whisper
Calling me...

I watched the skies turn dark
Now the storm will take me away
Could this be all that I'm longing for,
To join her again?

I can take her in the rain now
While her clouds surround me
She's so lovely as she kills me
This is it...

I watched the skies turn dark
Now the storm will take me away
Could this be all that I'm longing for,
To join her again?

Come down and take me away
