

# Nothing Good Happens After Dark

Greeley Estates

One look in their eyes  
And you should have seen that there is  
Nothing else that they want of you than to feed on you  
You know they just want your body  
now it's not so sexy

We tried to warn you about the dark  
But you never listen to us anyway  
They showed their fangs but you still stayed  
You should have known that they were thirsty

Wish I didn't have to talk to your grave  
All the times that we tried to warn you  
Just a little, a little bit attracted to  
All the times that we tried to warn you

We tried to warn you about the dark  
But you never listen to us anyway  
They showed their fangs but you still stayed  
You should have known that they were thirsty

Now it's over and you're dead  
Now it's over there's nothing left of you

We told you not to ever go out by yourself (come on!)  
We told you not to ever go out by yourself  
Because they're out there and waiting for you

We tried to warn you about the dark  
But you never listen to us anyway  
They showed their fangs but you still stayed  
You should have known that they were thirsty

We tried to warn you about the dark  
But you never listen to us anyway  
They showed their fangs but you still stayed  
You should have known that they were thirsty

Now it's over and you're dead  
Now it's over there's nothing left of you
