

Too Much CSI

Greeley Estates

Best night of my life
Blood and dirt remind me that I'm alive
I failed to see this coming
When all the signs pointed at you
I should have known it was you
I should have seen in your eyes
Its twisted how you set me up
I never thought that you were who you are
To think I trusted in you
When this was always part of your plan
I should have known it was you
I should have seen in your eyes
Tie me up behind this truck so that I won't forget you
Keep dragging me just like you are
You know I won't forget you face
I'm holding on for my revenge
Cause if I die tonight then you get away
The pain is not the issue
Just think of what I'll do to you
I should have known it was you
I should have seen in your eyes
Tie me up behind this truck so that I won't forget you
Keep dragging me just like you are
You know I won't forget your face
Forget you face, your face. forget your face.
I can taste my sweet revenge
You know that we'll meet again
I can taste my sweet revenge
You know that we'll meet again
I failed to see this coming
When all the signs pointed at you
Tie me up behind this truck so that I won't forget you
Keep dragging me just like you are
You know I won't forget your face
Forget you face, your face. forget your face.
