

## Every Street In Town

Greg Brown

I knew a woman,  
She was my friend,  
When we met I felt like  
I'd been born again  
Ah, we spent all our time outside  
'Cause people say small things  
when they stay too long in little rooms.  
In the sunshine In the rain or snow  
We even climbed a pinetree in a tornado  
Outside was where all our live was found  
And I guess we must have walked on every street in town.  
Every street in town,  
Every street in town,  
In the cool summer evenings  
Or when the snow was falling down,  
We'd go walkin' on every street in town.

She'd been gone such a long, long time  
But it's often I feel her right there by my side  
When I'm walkin' I'm talkin' to her In the wet and yellow fall  
Or past the parks in the summer  
Where the kids is playin' ball  
An' it's sometimes I see a woman out alone  
An' she worried about gettin' back to her home  
An' I think of my friend and all of the joy that we found  
When we's just walkin' and talkin' on every street in town.  
An' I wonder when the day will every come  
When we won't be so sad and so dumb  
An' when a woman could walk out free in the day and night  
Without havin' to worry if she's gonna be alright on  
Every street in town,  
Every street in town,  
In the cool summer evenings  
Or when the snow was falling down,  
We'd go walkin' on every street in town.
