

# Light Up The Dark

Greyson Chance

Byways, highways, freeways, I'm always your's  
Smoke billow wings from your blue eyes that got me from the start  
Planes glowing bright in the distance  
We're rising high

I am love sick and I just can't be healed  
It happened so quick, now I head over heals  
For you, 'cause you're the love of my heart  
You're the match and we spark the fire  
We light up the dark  
We light up the dark

Stars shining, rain falling, love is starting with us  
Free flowing melodies, playing on and on and on  
Planes glowing bright in the distance  
We're rising high

I am love sick and I just can't be healed  
It happened so quick, now I head over heals  
For you, 'cause you're the love of my heart  
You're the match and we spark the fire  
We light up the dark  
We light up the dark

I am a different person... for you  
You have, changed me, arranged me into something new  
I am love sick, and I just can't behave

Love sick and I just can't be healed  
It happened so quick, now I head over heals  
For you, 'cause you're the love of my heart  
You're the match and we spark the fire  
We light up the dark

love sick and I just can't be healed  
It happened so quick, now I head over heals  
For you, 'cause you're the love of my heart  
You're the match and we spark the fire  
We light up the dark
