Summertrain

Greyson Chance

Come with me for a little ride, see the shadows passing by Look at the sun and see the clouds turn to faces in the sky We've been awake all night, shattered dreams all around Close your sad, sad eyes we will be safe and sound

Come with me for a little ride, see the shadows passing by Look at the sun and see the clouds turn to faces in the sky Daydreaming lightly through the rain All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by Seems we are a thousand miles away from last night As you sigh in my ear, kiss the rain goodbye

Come with me for a little ride, see the shadows passing by Look at the sun and see the clouds turn to faces in the sky Daydreaming lightly through the rain All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by Come away with me, it's gonna be all right just breathe Come away with me, it's gonna be all right you'll see

And the windows are crying, but this train is flying us all thr ough the rain, I fear And the sky is getting brighter with every mile And it all seems clear

Come with me for a little ride, see the shadows passing by Look at the sun and see the clouds turn to faces in the sky Daydreaming lightly through the rain All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by Come away with me, it's gonna be all right just breathe Come away with me, it's gonna be all right you'll see

Come away with me, it's gonna be all right just breathe Come away with me, it's gonna be all right you'll see, you'll s ee

Come away with me
