

# I Need You

Ground Zero

I felt a silent current of love from you  
Strong, steady and deep  
For someone who has never had this kind  
Of experience  
There are no words to adequately explain  
Whoever thinks you're worthless  
I'm just saying  
You're the heart of my universe  
There's a special chemistry between us  
One built on unconditional love  
Ohhhhhh

I live on a planet  
Devoted to you  
Every where you go I gotta go too  
You can't escape me  
You're just everything I've ever wanted  
And to be this close to you  
I feel like I'm flying on our love  
I feel like I'm moving with your strength  
I feel like I need you  
Like you're my other half  
Which means I can't live without you

Ohhhhhh  
I seem to spend a great deal of time  
Just thinking about how mysterious and beautiful you  
are  
And how much my world has changed since you came along  
Who needs words when I can tell by your eyes  
What you're thinking  
Everywhere you go I'm by your side  
Any problem you have I'll help you through  
If I needed to I would give my life for you  
Ohhhhhh

I live on a planet  
Devoted to you  
Every where you go I gotta go too  
You can't escape me  
You're just everything I've ever wanted  
And to be this close to you  
I feel like I'm flying on our love  
I feel like I'm moving with your strength  
I feel like I need you  
Like you're my other half  
Which means I can't live without you

We are simply just two life forms  
Journeying in time, in love, with each other  
And I always say to myself  
What in life is better than you  
When ever I feel down  
You come along and make my frown turn around  
Before you came my heart was empty  
But now my heart is ready to explode  
Just cause I love you so- much

As soon as I looked into your eyes  
You had kidnapped my mind  
It was like you needed a warning sign

I live on a planet  
Devoted to you  
Every where you go I gotta go too  
You can't escape me  
You're just everything I've ever wanted  
And to be this close to you  
I feel like I'm flying on our love  
I feel like I'm moving with your strength  
I feel like I need you  
Like you're my other half  
Which means I can't live without you

Everytime I touch your chest  
I can feel the steady beat of your heart  
And I think you are  
Just so enchanting so mysterious so astounding  
You're everything to me and if I was told to leave you  
I would say the answer is no  
I'm never gonna leave your side  
You blow me up like dynamite

I live on a planet  
Devoted to you  
Every where you go I gotta go too  
You can't escape me  
You're just everything I've ever wanted  
And to be this close to you  
I feel like I'm flying on our love  
I feel like I'm moving with your strength  
I feel like I need you  
Like you're my other half  
Which means I can't live without you

Ohhhhh
