

# Walking On The Stars

Group 1 Crew

I see my life sometimes and I ask why  
My heart became like stone and turned to ice tell me what have I become  
But you came just in time like a shooting star across my universe out of the  
dark tell me what have I become

Take me away  
You save me from myself and all I do  
Cause life just aint the same when I'm with you  
I can climb the sky you got me walking on the stars

I see life through new set of eyes  
Set on someone different that I never realized  
Outside my mind is a lost world that lies  
But step into my thoughts you'll believe you can fly  
Your words like wings gravity they defy  
My heart like a leaf on the wind catchin rides  
They say we can't make it at least we gotta try  
We make to much sense to foolishly pass it by  
So I'm taking a rainbow up to the 5th floor  
Steppin out to see that you're really worth more and I  
See our love in 3d  
No more 2 dimensional worries  
Climb until the sky don't exist no more  
That's when I'll knock knock on your front door  
Open to the possibilities I ignored  
But I know now exactly what our love was meant for

Take me away  
You save me from myself and all I do  
Cause life just aint the same when I'm with you  
I can climb the sky you got me walking on the stars

Now, I can see my life from way up high  
And all the troubles I once knew I left behind  
I can climb the sky you got me walking on the stars

And I can see, much more clear  
When I'm lost in your atmosphere  
You pull me close, to the place  
Where you're always waiting  
So I won't stop, the walls are down  
Make my way at the speed of sound  
Hold me now hold me now

Lord, Take me away  
You save me from myself and all I do  
Cause life just aint the same when I'm with you  
I can climb the sky you got me walking on the stars

I can see my life from way up high  
And all the troubles I once knew I left behind  
I can climb the sky you got me walking on the stars
