

Picture Me Big Time

Guided by Voices

Picture me big time
Up along the range
With this woman of mine
Driving me insane
Parasites baby....
Don't you know
I can't lie to you
There was a band from Beantown
They drove the now sound
With a girl at the top of her lungs now
Yeah, a girl at the top of her lungs
She'd tell the people baby
The world will settle down for no one
I will deliver to you
To one another in every place
Who speak like brothers
And leave no trace
Of a world still divided by tongues
Yeah, the world's still divided by tongues
You want to keep it closer now,
don't you
But there are words that speak to everyone
Which I will deliver to you
I will deliver to you
I will deliver to you
