Standing On The Last Star

Guillemots

So, Cinderella sold her soul There's no such thing as rock and roll We all stood in the queue and sold our hearts

I think there was an accident
They came as quickly as they went
Now I'm half a million miles up in the sky

Standing on the last star Standing on the last star Spinning around

Standing on the last star Standing on the last star Feeling down Trying to find the ground

Don't cry
Don't cry
I know it'll be alright

I've been trying
I've been trying
To tell myself that all night

If this is the end of history
The final account
Nobody to pin your hopes on
No money to count
Not even lips to say goodbye

Standing on the last star Standing on the last star In the sky

Standing on the last star Standing on the last star There's no decent reason why

Standing on the last star Standing on the last star Waiting to die Somebody left the taps on in the sky

Oh, tell me

Will nothing in the world ever make you happy? Will nothing in the world ever make you happy? Is nothing in the world gonna make you happy? Is nothing in the world gonna make you happy?

Will nothing in the world ever make you happy? Will nothing in the world ever make you happy? Is nothing in the world gonna make you happy? Is nothing in the world gonna make you happy?

Will nothing in the world ever make you happy?

Will nothing in the world ever make you happy? Is nothing in the world gonna make you happy? Is nothing in the world gonna make you happy?
