Endlessly

So come on, love We can make this right If you want love Then come back inside Cause we had love We just let it slide

I tried to take your picture; you covered up your eyes Afraid of what I'd see, afraid of what I'd find A Polaroid that won't come through, you've disappeared And all I see is a drawn outline, ghosts in the mine Marking time

So come on, love We can make this right If you want love Then come back inside Cause we had love We just let it slide

Endlessly, we move asleep Desperately, carelessly Walk with me Talk to me Eventually, we'll get it right

So come on, love We can make this right If you want love Then come back inside Cause we had love We just let it slide

Endlessly, we move asleep Desperately, carelessly Walk with me Talk to me Eventually, we'll get it right

Guster
