

## Bring The Stars

H.E.A.T

I cant think of anyplace meant to be than right here in  
your arms  
the love I feel the hunger for you it keeps on haunting  
me  
and every night when I'm alone with you  
ohh you make me feel that I live inside our dream

You make the stars start falling baby bring the stars  
we will make all our promises under the stars

Days we'll think of days we'll never forget when you  
walked into my life  
like a storm meets sea that painted our memories with  
love

And every night when I'm alone with you  
oh you make me feel that I live inside our dream
