

We Will Never Die

H.E.A.T

She came out of nowhere, like a candle in the night
I'll always remember it, love at first sight
The way she was dressed was nothing in particular
But I almost knew that she was all that I wanted
Was searching for someone (someone like you)
To live and to like and to fight for

We will never die, stronger than ever
As we won't back down
We will never die, we'll be young for ever
The years pass fast by, we will never die

The times are a-changing, all the struggles (???)
Put all our arms to the test, but my face says something new
I find myself thinking we're far from indestructible
Now here we stand, some will ride, some will fall
Don't let the sunset, (hold on together)
You get what you've got and you've got enough

We will never die, stronger than ever
As we won't back down
We will never die, we'll be young for ever
The years pass fast by, we will never die
