

Flesh Devouring Pandemia

Haemorrhage

Early stage of contagion - Carnal decay
Gangrened muscles - Flesh melts away
Boils and vesicles cover your skin
Festering pemphigus - Oozing carbuncles

Streptococcus pyogenes
Clostridium perfringens
Spawning malicious antigens
Extensive putrescence

Necrotizing fascial tissues
Flesh-devouring pandemic

Sickness advancing out of control
Government restrictions on the population
Millions of corpses rot in the street
Spreading bacteriae over humanity

Streptococcus pyogenes
Clostridium perfringens
Spawning malicious antigens
Extensive putrescence

Necrotizing fascial tissues
Flesh-devouring pandemic
