

Call Me In The Afternoon

Half Moon Run

You can have it if you don't mind some or all the others stay with me

You confuse me with your riddles and your sudden generosity

Call me in the afternoon even by one by one (2x)

You can have it when you come by, you can have yourself a one-man way

I saw you when it caught your eye and it's such a petty price to pay

Call me in the afternoon even by one by one (2x)

Take one if you need it but you really shouldn't be out this late

Really really really really... wanna make you feel home

Take one if you need it but you really shouldn't get this fucked up

Really really really really... wanna get it to you

Slide another shot by and wipe your dirty hands on me

Swallow till you go blind and find a little company

Call me in the afternoon even by one by one (2x)

Take one if you need it but you really shouldn't be out this late

Really really really really... wanna make you feel home

Take one if you need it but you really shouldn't get this fucked up

Really really really really... wanna get it to you

After all, when I listen, it could be you, could be anyone that I want now
