Crucible

The cause of my affliction Can never be resolved A case for self infliction Whose sin can't be dissolved

Lost in a room of mirrors There's only one way out But suicide is easy When all you have is doubt

Idolize the demigods The weapon of stigmata Drowning in the grail of blood The weapon of stigmata

Each day becomes fragmented It's harder to connect My world seems so demented I see nothing to respect

But strength is born from weakness And this is where I fall I step up to the enemy Then rise from where I crawl

Idolize the demigods The weapon of stigmata Drowning in the grail of blood The weapon of stigmata Behind my back In my face Walking stalking

In my space Think I'm closed up But I know, I mark all Watch where you go

Bide my time Make you stop Watch your mouth Until you drop

Make me sick I can wait When you stumble Seal your fate

Empty threats Fucked up lies Take you down With alibis

Useless strength Wastes on me Crush you down Dead enemy Idolize the demigods The weapon of stigmata Drowning in the grail of blood The weapon of stigmata

Penance from the rancid icon Virgin weeping plasma Idolize the demigods The weapon of stigmata Weapon of stigmata Idolize the demigods The weapon of stigmata Weapon of stigmata The weapon of stigmata
