## **All Our Love**

Hall & Oates

Why don't you pack I'll take you back To the countryside Now's the time I've got a little place in mind. We don't need no neighbors making noise at night, Dogs that fight You'll sleep like a child, The city steaming miles away.

Never thought you'd see the good life Let me tell you how it feels We can let our hearts be open, wide, So all our love will come through.

Up and gone, we'll be moving on When the morning comes This is the way, I heard that it's supposed to be. I can almost see the flowers growing there Taste the air We've waited awhile, I never thought we'd see the day.
