

# Out of Me, Out of You

Hall & Oates

I need you more than anyone else in the world  
But what you need more than me  
Is the help I can give to you girl  
That's what you need

You can make it happen  
I can show you the way and help you to say  
How you're feeling inside  
Lower your shield is it's real and you feel it

Then what can come out of me  
Can come out of you  
I know the truth, I know it baby  
The love that comes from me  
Can come out of you

Can't you see that this game that you're playing with me  
Is holding you back?  
Black or white? Shades of gray are more like it you know  
So let yourself go

You can make it happen  
I can show you the way and help you to say  
What you're feeling inside  
Lower your shield is it's real and you feel it

Then what can come out of me  
Can come out of you  
I know the truth, I know it baby  
The love that comes from me  
Can come out of you

What can come out of me  
Can come out of you  
I know, I know, the love  
The love that comes from me  
Can come out of you

I'm gonna give you one more try  
And see what you can do girl  
I'm gonna give you one more try  
And see what you can do girl

I'm gonna give you one more try  
And see what you can do girl  
I'm gonna give you one more try  
And see what you can do girl  
I'm gonna give you one more, one more try

Then what can come out of me  
Can come out of you  
I know the truth, I know it baby  
The love that comes from me  
Can come out of you  
I know, I know, the love

Then what can come out of me

Can come out of you  
I know the truth  
The love that comes from me  
Can come out of you  
The love I know
