

## So Close

Hall & Oates

They met on the dance floor in the old high school gym  
He fell like a rock  
She kinda liked him  
And his heart beat like thunder as they moved cross the floor  
But when the music was over she slipped out the door  
Yeah a man loves a woman but he can't understand  
Why she's sad when she stares at the ring on her hand  
Then she sits in some club where the long shadows fall  
Drops a coin in the jukebox not the phone on the wall

[Chorus:]

So close  
Yet so far away  
We believe in tomorrow and a better day  
We lie down to sleep so close  
Yet so far away

There's a restless look in you eye tonight  
There's a secret hurt in my heart  
And the dream that pulls us together girl  
Is a dream that keeps us  
So close  
Yet so far away

Some people think if you really believe  
That's all you need to solve all the mysteries  
Well I know someone who just heads for the sun  
She says "I don't wanna be wise, I just wanna stay young"

[Chorus]

There's a restless look in your eye tonight  
There's a secret hurt in my heart  
And the dream that pulls us together girl is a dream  
That's gonna tear us apart
