Goblet Of Gore

Hallows Eve

As the madman we all know who writhed on a crucifix I too have been sacrificed by death and her tricks

Pursue the grail to make a wish And drink from the goblet of gore Souls are but small giblets Please death care for more?

In my anger ten more pills Shall I gather seven hills? Lock the horns into place Call upon the human race

And I would pray: Bitch which art in heaven above Hallowed be thy name Thy violence come, mayhem be done On Earth as it has in Rome Give us this day our daily gore Forgive us for being poor Cause maybe if we pay enough, We can wield upon the whore!

I met an alter side of myself He said I don't know all but I'm learning I'm tired of quiet revolution I feel a violent yearning

So gather your masses Be masters of your fate Be all that you sow There is war in the shadows I am the master of hate Delivering the final blow!!!

We the people shall destroy !!!....

The whore, my lord, she shall not want She eateth though I wield She creates the bondage, we are sheep in her field Her cup runneth over with my blood And she wants more Death, I am your filthy grail... Your Goblet of Gore... All that I sow Of this horrorshow!
