

## I Just Want You To Know

Hank Snow

I want you to know if things should go wrong  
As you walk through your world if you're walking along  
Give me your burden I'll carry your load  
Remember I love you I just want you to know

Whatever you do or whatever they say  
There's someone believing in you all the way  
Anytime you feel lonely or need someone to hold  
Remember I love you I just want you to know

I want you know when we're far apart  
When I cannot steal to you heart to heart  
If warm lips should whisper sweet words that aren't so  
Remember I love you I just want you to know  
Remember I love you I just want you to know
