

That's You and Me

Hank Snow

Look at you look at me just how different can we be
Day and night wrong and right that's you and me
I love you you love me but we love so differently
Yes and no stay and go that's you and me

You and me we just can't be close to each other
Everything is all mixed up in some way or other
I love you you love me but we love so differently
Black and white day and night that's you and me

I blame you you blame me and we go on constantly
Round and round up and down that's you and me
I tell you you tell me it's your fault that we disagree
Just the same you're to blame that's you and me

You and me we just can't be close to each other
Everything is all mixed up in some way or other
I tell you you tell me it's your fault that we disagree
But like turtle doves we're still in love that's you and me
Like turtle doves we're so in love that's you and me
